Baxi Megaflo System HE range extended

Leading boiler manufacturer Baxi has extended its popular Baxi Megaflo System HE range. It is now available in 15, 18 and 32 kW outputs, as well as the original 24 and 28 kW models, with a model to suit every domestic application.

The Baxi Megaflo System HE boiler is the natural partner to the market leading Megaflo HE, an unvented hot water storage cylinder, manufactured by Heatrae Sadia. Fed directly from the cold water mains, unvented cylinders provide an ideal solution for households requiring large volumes of hot water at mains pressure, for example for powerful showers and fast filling baths.

The Baxi Megaflo System HE boiler has a compact design and attractive finish. It is supplied in robust packaging with built in handling points to aid installation, and clearly displayed pictorial unpacking instructions. For ease of fitting, a pre-plumbed jig and one metre 'flying lead' for electrical connection are provided.

The range is backed by a two year parts and labour warranty, and is supported by **heateam**, the largest heating OEM service provider in the UK. With a nationwide network of over 200 field service engineers and a team of highly trained call centre staff, **heateam** offers responsive technical support and advice for installers and homeowners.

For more information please telephone 08706 060623.
