BAXI

EMBARGOED UNTIL 00.01, THURSDAY 30 AUGUST 2007

Baxi Duo-tec rated Britain's Best Buy combi boiler by Which?

UK boiler manufacturer Baxi is celebrating its success after one of its combination boilers was voted Best Buy by leading consumer magazine *Which?*

The Baxi Duo-tec Combi 28 HE achieved 5-star ratings for efficiency, low NO_x emissions (Nitrogen Oxide), features and installing. *Which?* described it as a great choice for flats and smaller houses.

Raxa Chauhan, product manager for Baxi, said: "At a time when climate change, global warming and high fuel costs are constantly making headline news, we are delighted that the Baxi Duo-tec Combi 28 HE has been recognised for its performance, efficiency and environmental credentials.

"Baxi has invested greatly in research and development to minimise emissions and increase the efficiency of its boilers, helping to reduce the effects of domestic heating on the environment.

"Householders benefit from the convenience and flexibility of having hot water on tap almost instantly, and from substantial savings on their fuel bills by only heating the water they use. And they are doing their bit to reduce the effects of climate change."

The *Which?* review of the Baxi Duo-tec Combi 28 HE states: "It's one of the few boilers we've tested which reaches the very highest efficiency standards, matching its claims to meet the A SEDBUK standard. As well as offering excellent efficiency, this boiler is reassuringly easy to use."

RELEASE REF: BAXI 030

BAXI

Which? rigorously tested 34 boilers from a selection of leading manufacturers for fuel consumption, durability, energy efficiency and emissions. In addition, each was evaluated by a Corgi registered gas installer on how easy it was to install, service and use. The four Best Buys are judged as being “highly efficient, user friendly boilers that won’t let you down.”

The full report can be found on the *Which?* website www.which.co.uk

The Baxi Duo-tec Combi HE range also includes 24, 33 and 40kW outputs so there is a model available for most domestic applications. The range has been subjected to extensive life cycle testing and comes with a two year parts and labour warranty.

Baxi’s after sales service division **heateam** is the largest OEM service provider in the UK, and operates a swift and effective response service for installers and homeowners.

For more information on the Baxi Duo-tec Combi HE range please call 08706 060 623.

Notes to editor

SEDBUK stands for Seasonal Efficiency of a Domestic Boiler in the UK. Boilers are rated from A (energy efficiency of more than 90%) to G. The Building Regulations require that only gas boilers with SEDBUK A or B ratings can be installed (unless certain exception criteria are met). The SEDBUK ratings of current boilers can be found on the Boiler Efficiency Database at www.sedbuk.com
